The start of a New Year is a good time to try to break old habits and form new ones. What better time to make a New Year's resolution? But resolutions are much easier to make than to keep, especially for those with weak willpower. That's why it's important to use specific strategies to help you stay in control and make your resolutions stick. From getting fit to making more money, one's list of goals may be long, but trying to achieve too many things at once can easily lead to failure. Make your resolution easier to keep by focusing your energy on just one behavior.
