A 7.4 magnitude earthquake that hit Mexico's southern coastline on Tuesday, collapsing buildings and prompting evacuations, has left at least five people dead, officials said.

The earthquake occurred at 10:29 a.m. local time, with an epicenter 6.8 miles southwest of Santa María Zapotitlán in Oaxaca state, near El Coyul.

At least five people were killed, according to the coordinator for Mexico's National Civil Protection Service.

The Oaxacan Health Services also reported damages from the quake to general hospitals in Pochutla, Puerto Escondido and Pinotepa Nacional and a few community hospitals in other areas.
