Music is a powerful thing. When played properly, some music can have positive effects on learning and attitude. One way that music can make learning easier is by teaching people abstract reasoning and learning strategies. When learning music, people visualize the task in their head, and therefore exercise the same abstract skills that engineers, chess players, and high-level mathematicians use. Moreover, instruction in music skills and appreciation provides a wealth of learning strategies that help to develop children's analyzing, synthesizing, and evaluating skills.
