Dial M for Murder(電話謀殺案) is Hitchcock's work in 1954. It is an uncommon detective film because this movie is educational. We can use it to cultivate the ability of our students to think logically.

The detective in the movie speaks with a British accent, very gentle and very smart. His method to prove that someone is guilty is quite rigorous. The best part is that he designed a trap to make the real guilty guy reveal himself. This is rather tense. Yet it makes the viewers never forget it.
