Welcome to this museum! This month, we are having a special display about old machines from different countries. You can find the ways that machines were used to help people one hundred years ago. How did the Germans make their first car(s)? How did our ancestors use their farming tools? When did the Americans start to try to make their planes? And when did the Spanish make comfortable shoes in their factories? You will find the answers. After this trip of the machine history, enjoy our coffee in the coffee shop of this floor.
