你相信你的車子會說話嗎？假使你的車子會思考、感受，並和路上的其他車子說話，你覺得如何呢？這樣的時代可能即將來臨。在歐洲，汽車製造商試著在車內裝設特殊電腦設備，一旦目標達成了，車子就可做些遠超過我們所預期的事，例如車子可分辨路況，並且遠離塞車區域，除此之外，路標會傳達給每部車子，車子就會正確行駛，沒有人會違反交通規則。由於汽車會自動駕駛，因此未來將有個無事故的世界，是嗎？你怎麼想的呢？

時代 age

裝設 set up

路況 road condition(s)

1100712 大專院校畢業生 中翻英短文翻譯 參考答案

Can you believe your car can talk? How do you feel if your car can think, feel and talk to other cars on the roads? The age may be coming soon. In Europe, car makers are trying to set up specific computer systems inside the car. Once the goal is achieved, cars can do something more than our expectation. For example, cars can tell the road conditions and leave from the traffic jam areas. Besides, road signs will be sent to each car and cars will be driven in a correct way. No one will be against the traffic rules. Due to cars driving automatically, there may be an accident-free world in the future, right? What do you think?
