## 1100524 大專院校畢業生 中翻英短文翻譯 參考答案

If we want to reform, we should change from our thoughts. Many people have a stereotype. They think people with some physical deficiencies are unable to engage in some occupations. They neglect that some physical deficiencies can be overcome or can be replaced by some other ways. For example, I've seen a successful painter. He doesn't have hands, but he uses the paintbrush by his feet successfully. He accomplished admirable paintings one after another.
