Mainland China puts much emphasis on semiconductor industry. But, in terms of manufacturing high class IC products, they are indeed behind us. This is also a problem which has been noticed by the Chinese government. What we should ask is: Why is the case? The support from the Chinese government to the semiconductor industry is actually far greater than that from Taiwan. Maybe you could try to figure out the reasons. I would also try to talk about this issue here and hope that I can explain part of the reasons.

semiconductor 半導體

manufacture 製造

1100222 高中職生 英翻中短文翻譯 參考答案

大陸相當重視半導體工業，可是在製造高檔 IC 產品方面，他們確實不及我們，這也是大陸政府一直以來注意到的問題。我們應該問的是：為什麼會這樣？大陸政府對於半導體工業的支持事實上是遠遠超過臺灣的。也許你可以試著找出原因，我也試著在此聊聊這個議題，希望我可以解釋部分原因。
