In the past, I didn't have any audio equipment. Lately, after recovering from a serious illness, I all of a sudden decided to lavishly use my saving. I asked someone to help me buy a rather good audio system. But after having the audio equipment, I found there's no place to put. Therefore, I found a designer to design an audio rack for me. The designer told me that there was a master whose surname was Huang. He could make the rack and install it for me.
