### 1110207 大專院校畢業生 中翻英短文翻譯 題目

富岡地質公園(Fugang Geopark)位於北回歸線以南，屬於高溫多雨的熱帶季風氣候。這裡的植物生長快速。你可看見有些樹木還出現板根、氣生根等現象，顯現出熱帶海岸多樣的風貌。在富岡地質公園的各區，你可以看到生長在高位珊瑚礁上的多種熱帶植物，以及它們各自的特色。

北回歸線      Tropic of Cancer

季風          monsoon

板根          buttress root

氣生根      aerial root

## 1110207 大專院校畢業生 中翻英短文翻譯 參考答案

Fugang Geopark is located at south of the Tropic of Cancer and belongs to a tropical monsoon climate with high temperature and rainfall. Plants grow fast in this area. You can find buttress and aerial roots in some trees, which shows the diverse features of tropical coasts. In each area of Fugang Geopark, you can see a variety of tropical plants with their own characteristics growing on the uplifted coral reefs.
