Shawna wonders if the new diet she is on is paying off. She steps onto a scale in the bathroom. The scale reads 15 kilograms. She thinks the scale may be wrong, so she steps off and then steps onto it again. But according to the scale, she still weighs 15kg. There is nothing wrong with the scale. Shawna is wasting away to skin and bone(s). Apparently, the diet is working too well. She can now hide behind a broom. She is officially a human bookmark. She had better go and eat something soon or she is going to be blown away! She finally becomes thin, but she is not healthy.
