Do you know how long we can live without drinking water? Only three days! But we can live over three weeks without eating food. Our bodies contain about 60% water which keeps our bodies working so we must resupply water we lose through sweat and other ways. The following are goods of drinking water.

1. A healthy balance: Drinking plenty of water helps our bodies keep a healthy balance of fluids.
2. Weight loss: Water makes people feel full and helps reduce our hunger to eat.
3. Clearer skin: Drinking enough water washes away the toxins and gives people better and clearer skin.

Enough water is key to a healthy life so let's drink more water together.
