At first, all of the stars denied that they had used drugs. Two TV show hosts even held a press conference to deny they had ever smoked marijuana. However, the next day, they both tearfully admitted that they had indeed used illegal drugs.

A few weeks later, hair and urine samples proved that seven of the stars had actually used illegal drugs. Although most of the stars claimed that they had only used these drugs in other Asian countries, all of them will have to go through mandatory drug rehabilitation programs.
