### 1120102 大專院校畢業生中翻英短文翻譯參考答案

The human race has often feared the unknown or the unexplained, and for thousands of years earthquakes were one of those unknowns. People could not understand what made the earth tremble, and their fear of the unfamiliar led to the birth of some amazing myths and legends. One of the biggest legends comes from Japan: the story of Namazu, the giant catfish. Namazu was a mythological creatures that were known for causing earthquakes. When the god of Kashima restrained Namazu with a huge magical stone, the earth was still. But when the god dropped his guard or got tired, it gave Namazu some space to struggle, which caused earthquakes.
